RE: Application for Full Stack Developer Position – Yaser Shaikh (.NET / MERN / PHP)

Dear Director of Human Resources,

I honestly believe that this job is what I was meant to do. It's the perfect match for my skills, experience and interests. My passion for this field, combined with my respect for your company, make me eager to get on board.

I offer a strong blend of technical and analytical capabilities that I have developed through a rewarding career across diverse domains including Event Management, Education, Government platforms, Pharma, and POS-based systems. Over the years, I have honed my backend development and API engineering skills, while being highly proficient in problem-solving, team collaboration, and delivering clean, maintainable code. In my previous roles, I have contributed to organizational improvements, streamlined workflows, enhanced system performance, and supported cross-functional teams in achieving key project goals.

My qualifications include an MCA from Goa University, supported by hands-on experience in Core PHP, MVC, MySQL, MERN Stack, and .NET Core MVC. Most recently, I worked as a Software Developer at Team Inertia, where I was responsible for building backend architectures, developing REST APIs, designing database schemas, integrating payment gateways, and implementing CRUD operations across complex modules. In this role, I refined my expertise in PHP Core development, API integrations, AJAX-based UI enhancements, and React-based interfaces, while also gaining experience in .NET MVC with SOLID, Entity Framework Core, and Clean Architecture for internal applications.

With this combination of technical skills, real project experience, and a consistent record of contributing to high-quality deliverables, I am confident that I would be a valuable addition to your organization.

As my resume shows, I have the skills and experience needed for this role. I would appreciate the opportunity to discuss how I can contribute to your team. Thank you for considering my application.

Sincerely,
Yaser Shaikh
